

EUGENE LERMAN

SENIOR SOFTWARE ENGINEER

Tel Aviv, Israel · (+972) 52-3535-231 · lerman.gene@gmail.com · github.com/airbugg · linkedin.com/in/lerman-gene · eugenelerman.net

I build the pipelines, platforms and release machinery other engineers stop noticing — which is the point. A decade of making migrations boring: AngularJS exoduses, weekend CI cutovers, clients rewritten in months. Voracious reader; still somewhat philosophical about it.

EXPERIENCE

Rylo AI communication platform for the Deaf and hard-of-hearing · \$100M+ raised Feb 2026 – Present
Software Engineer Tel Aviv

- Part of the five-person crew that rewrote the entire client stack — native iOS (Swift), Android (Kotlin) and React Native — in three months, working spec-first with 3–5 coding agents running implement–review–validate loops in parallel.
- Built the platform under the rewrite: a monorepo housing the apps, a design system with automated Figma sync, and client CI/CD — all from scratch.
- Re-architected mobile release engineering on my own initiative: an automated release pipeline with a web UI for cutting branches and shipping builds, feeding an internal app-distribution system I built when Firebase’s stopped earning its keep.
- Put the team’s shared agent setup on a diet after noticing every fresh session started 70k tokens in debt: lean, focused skills, progressively disclosed, code as the source of truth.

Remitly Israel (formerly Rewire) cross-border banking & remittances Dec 2022 – Feb 2026
Staff Software Engineer · Client Infrastructure Tel Aviv

- Lead engineer of the Client Infrastructure team: technical planning and cross-team initiatives spanning ~10 teams and three products (~10M MAUs).
- Designed the localization platform: translations delivered dynamically with version-scoped production hotfixes (previously: cut a release), plus a diff-driven CI pipeline that extracts changed strings, files translator tasks, and stops blocking merges.
- Moved all client CI/CD from GitLab to GitHub Actions across 4–6 teams: runtimes down 50%+, cutover done in a weekend. Monday passed without comment, which was the goal.
- Migrated tens of thousands of strings to semantic keys with an AI service I built — model-suggested names, human-approved in a purpose-built UI, applied as auto-generated PRs. Two weeks of talking to product; hours of actual migration.
- Rolled out Apollo GraphQL client infrastructure — generated types plus client links for auth, caching and batching.

Remitly Israel (formerly Rewire) Jun 2020 – Dec 2022
Senior Software Engineer Tel Aviv

- Led the migration of the core product from an AngularJS/React web app to React Native, carrying the company into its mobile-first era.
- Designed an XState-based orchestration engine modeling financial flows — send money, deposit, re-authentication — with over-the-air business-logic updates: no redeploy, no app-store queue.

Wix.com Feb 2017 – Nov 2019
Software Engineer Be’er Sheva / Tel Aviv

- Tech lead on Wix Forms: designed the first first-party app on the Editor platform SDK; its patterns became the template for the first-party apps that followed.
- Extracted and externalized the Editor’s monolithic authentication — foundational code under every editor-built site, and still one of my proudest pieces of surgery.

Yeger-Lotem Lab, Ben-Gurion University Feb 2015 – Feb 2017
Full-stack Developer (part-time) Be’er Sheva

- Co-author: “TissueNet 2: a quantitative view of protein interactions across human tissues”, Nucleic Acids Research, 2016.

TOOLBOX

Languages	TypeScript & JavaScript (native tongue) · Python · Swift, Kotlin, Objective-C (productive; agents cover the accent)
Client	React · React Native · Expo / EAS / Nitro Modules · XState · Apollo GraphQL · Tailwind · Reanimated · Svelte · Angular
Infra	Node · Bun · GitHub Actions · GitLab CI · Terraform · Pulumi · AWS · Kubernetes + Helm
AI	Claude Code · Codex · Cursor · multi-agent loops (Ralph, software-factory setups) · MCP & skill authoring · context management that respects the window

EDUCATION

BSc, Computer Science & Bioinformatics Ben-Gurion University of the Negev 2013 – 2017
